Collection

RUG STAR TUFT

My signature is LOVE

Hooray! Our beloved company has an exciting anniversary coming up and we are ready to celebrate. Ladies and Gentlemen, I am honored and happy to introduce you to our brand new Signature Collection, an extraordinary compilation of the BEST OF RUG STAR designs that we have launched on the market over the past 15 years.

A compilation created to show you the magnificent range of beauty we managed to create since 2002 and also a compilation to show you what we are capable of.

For this reason we translated all of these designs into our new product range, high-end luxury tuft. Tuft is the word, and I have been using it a lot over the last year.

Tuft is highly underrated by most manufacturers and designers; we, however, recognized its great potential and the cutting edge expressions which we are able to create with this product for private homes and hotel contracts.

So let me take you by your hands and escape with me through the following 21 beautiful room sets, each one presenting one iconic RUG STAR design at its finest.

As I look at this catalogue, a compact review of 15 years of design work released under the name RUG STAR, one fact always was and still is very clear to me:

My signature is LOVE.

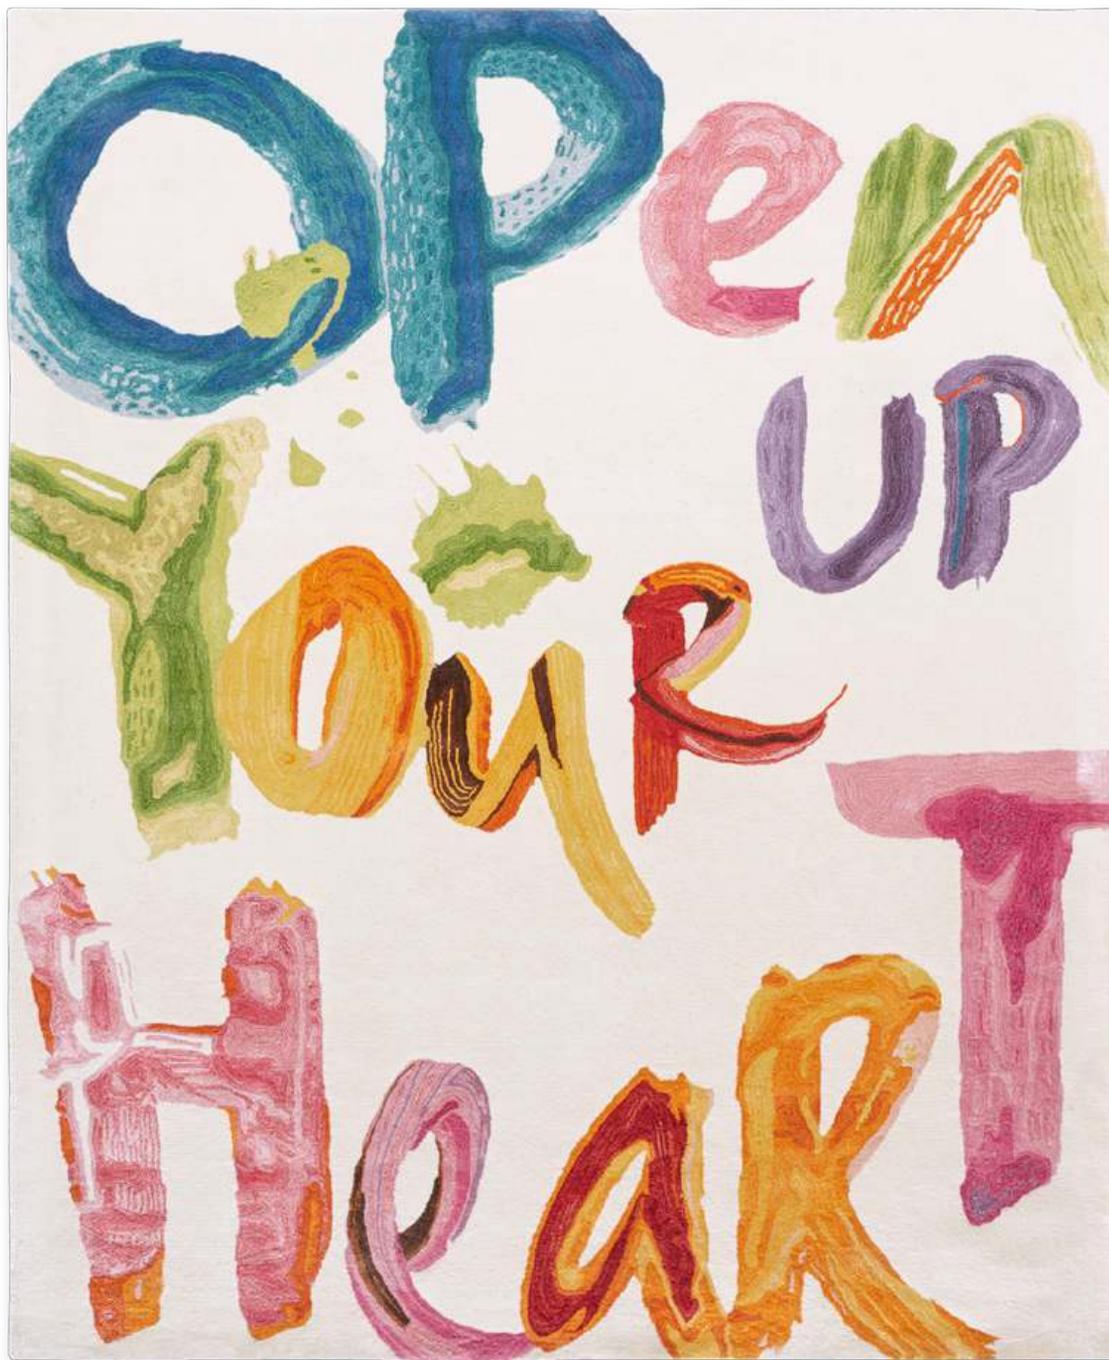

Jürgen Dahlmanns,
founder and creative head of **RUG STAR**
