STORYTELLING CRAFTSMANSHIP AT IT'S BEST

Welcome everyone, to the premiere of our first RUG STAR TUFT catalogue WATER, EARTH & AIR, 3 elements which we have chosen in order to talk about the enormous beauty we can find in our so beloved world.

In the first chapter WATER I will present to you our two collections Koi and Jellyfish. My tender characters move flexibly, smoothly and silently through their environment water. Never forget, water is the foundation of life on this Earth.

With chapter EARTH we enter the world of objects. I am very proud of the two stunning collections we created: Orchid and Rooster, beautiful in their power of details and powerful in their scale.

In our last chapter AIR you will meet our always busy and lively Hummingbirds, looking for nectar in the calyx and expressing the joy of movement.

With Flying Fish, a couple of lovely fish sail through a blue and cloudy sky, I will end this cycle, for which it took me 12 months to create and produce in Berlin and in the workshops from Beijing to the South of China.

I am proud to say: our European and Chinese talents managed a storytelling craftsmanship at it's best, with the exquisite graphic potential of the finest luxury tuft you can get on the market. I love this product; tuft is my new product baby.

A special thanks to the very talented Berlin based artist and friend Miron Schmückle, who created the basic artwork of Jellyfish, Orchid and Hummingbird for us.

Jürgen Dahlmanns,
founder and creative head of **RUG STAR**
